

The Little Giants for Day Spas & Salons

A rugged "little" machine delivering a giant clean

Daily Laundry Battle

Getting oils, scrubs, lotions and chemicals out of towels, robes and smocks is a daily battle for most hair salons and day spas. Unfortunately, most rely on residential machines to get the job done and these machines are not built for this kind of use. The problem: residential machines do not have the programs to accommodate a wide range of fabrics and can not reach the temperatures needed to dissolve these oils for proper cleaning. The Little Giants do!

450 Regis Hair Salons in the U.K rely on Miele Little Giants to get the job done. And now, Vidal Sassoon, Regis's sister company in the U.S. has taken a page from the U.K practice book and has installed Little Giants at its salons in Seattle and Boston.

Why Little Giants

- Water temps in excess of 200° F to melt oils and residue from fabrics.
- Moisture Controlled dryers for safer, more energy efficient drying.
- Honeycomb Drum™ provides superior garment care -- garments last 4 x longer.
- Special towel and linen wash programs in 21 languages.
- Highest extraction available - significantly reduces drying time and energy costs.
- Lint filter is easily accessible in front of dryer -- requires little maintenance.
- Main bearing designed for 25,000 operating hours (If used 6 hours a day, six days a week, the machines will last 13.3 years (and most last far beyond that.)
- Small footprint. Easily fits undercounter or stacked for closet placement.
- Enhanced Safety: The combination of high temperatures cleaning to dissolve oils; reduced drying times, and a cool down at end of drying cycle; reduces the incidence of dryer fires.
