

Architects and Construction

Whatever commercial laundry products and services you are looking for, you will find it at JTM Service.

Laundry Room Design

We have worked with a number of architects and construction companies to help them design laundry rooms for care homes, housing associations and the NHS, that not only comply with legislation but also take into consideration planning for any utilities that are required.

We appreciate that you are often under pressure to develop cost effective designs and also to deliver them on time as well as keep to budget. We can help you develop laundry rooms as well as supply all the machine and appliances.

Laundry Solutions from JTM

- Get a partner who can help you to give your clients laundry rooms that are expertly designed and also consider costs at all stages.
- Let us do the hard work and help you with the design as well as the first fix to avoid any costly mistakes such hot water supply or venting for tumble dryers.
- Make sure that you adhere to legislation such as WRAS Category 5 guidelines for care homes and hospitals.
- Provide specifications for all the machines required as well as providing a full installation service by our fully trained engineers.

Site Surveys

We will work with you to develop your laundry room plans for you client and if required visit the site and undertake a full site survey with you to ensure that we fully understand what is needed.

Experience and Knowledge

We have over 27 years experience of planning and developing laundry rooms for a range of organisations. Not only can we help you plan laundry rooms we can also recommend the right machines, detergents and laundry accessories planned in a way that will work most cost effectively for your clients.
