

## **SMEG PRESENTS THE NEW HOOD TYPE DISHWASHERS**

With over 30 years of experience in the hospital, care and professional catering sectors, Smeg has consolidated its position in the professional sectors, offering solutions dedicated to the needs of professionals, whose prerogatives are reliability and efficiency. This experience has contributed to the development of professional high-performance washing systems for the catering sector.

Smeg hood type dishwashers guarantee absolute hygiene for all types of dishes, providing the space needed to wash even the most bulky accessories thoroughly. The range of hood type dishwashers has been enhanced with a new model, made entirely in Italy and fitted with new technologies.

### **SMEG SPH515 / SPH515S DISHWASHER**

Topline series hood type dishwasher with insulated double-walled AISI 304 stainless steel structure. Provided with 7 programs and maximum hourly productivity of 918 dishes. The new machine structure, thanks to the lever effect, makes the opening and closing of the hood easier and the improved lifting system with an ergonomic handle on three sides makes it easier to use. The enlarged 470 mm opening allows you to wash even large trays.

Maximum washing performance in terms of efficiency is guaranteed by the new filtering system, which, by keeping the water in the tank even cleaner, allows excellent results and significant water savings. Certified with a test based on EN 50593.

The optimized PowerHeat heating management, which is compliant with the new DIN10534 standard, ensures improved performance by increasing the washing and rinsing temperatures to at least 71°C, by simultaneously heating the tank and boiler.
