

GOOD LAUNDRY PRACTICE GUIDE

JTM Service Ltd
Commercial Laundry Equipment
& Dishwasher Experts

Handwash

Sorting

- Wash your hands regularly
- Wear the correct PPE e.g. gloves, mask, apron
- Do not sort laundry on the floor - use bins and trolleys
- Separate any foul or infected laundry and place into correct colour coded trolleys
- Never allow dirty laundry to come into contact with clean laundry

Washing

- Take care not to overload or underload machines
- If loading soiled or infected laundry, place the unopened red bag in the washer
- Use a sluice/disinfection cycle for all foul and infected items
- When unloading, remove the red bags and place in the bin
- Load the clean laundry into the correct clean trolley
- Leave washing machine door slightly ajar after the wash

Drying

- Place the clean linen into the dryer, picking the appropriate cycle
- Do not overdry clothes to minimise creasing and save energy
- Take all clean and finished laundry to their appropriate rooms in the correct trolley
- Clean dryer lint filters regularly

General

- Clean all machines down daily and ensure all surfaces are clean
- Only use certified Professional laundry equipment which is fit for purpose
- Report any faults to the manager, and keep an 'Issue Log' of any faults
- Please leave floor areas clean at all times
